MESHIA REED | Desktop Support Technician II

Detail-oriented IT professional with hands-on experience in workstation deployment, hardware/software troubleshooting, and Active Directory administration within environments. Skilled in configuring and supporting Windows operating systems, managing user access, and ensuring compliance with security protocols.

TECHNICAL SKILLS

Operating Systems - Windows 10/11, Windows Server 2019, macOS, Rocky 8 Linux, Ubuntu
Networking - TCP/IP, DNS, Network configuration, Routing, Switches, Firewalls, Recovery Skills, Network troubleshooting, Security protocols
Languages - JavaScript, HTML, CSS, Python, SQL, Mongo, JSON, Typescript, EJS, DTL
Database - PostgreSQL, MongoDB, MariaDB | **Other** - RESTful Routing, JSON API
Frameworks and Libraries - React (class-based and hooks), Express.js, Django, jQuery, Bootstrap

PROFESSIONAL EXPERIENCE

Deployment Specialist (Contract) | Powers Health | Munster, IN — April 2025 – Present

- Provided end-user support for Windows 11, Microsoft Office applications, and Microsoft Outlook within a healthcare environment, resolving Level I and Level II incidents via Cherwell.
- Deployed 150+ Windows 11 workstations, including imaging, software installation, printer setup, and cable management, ensuring compliance with organizational standards.
- Resolved Level I and Level II desktop incidents and documented solutions in Cherwell ticketing system.
- Updated Active Directory user information and member group assignments to maintain accurate access control.
- Assisted security engineering team in inventorying and securely disposing of 300+ retired assets, removing hard drives and RAM to ensure data protection.

Software Engineer | Reed Creative Werx — August 2020 – Present

- Designed and implemented over 15 applications using MVC-based architecture, leveraging React for interactive front-end GUIs and Test-Driven Development to ensure robust functionality.
- Utilized the Express.js framework to define HTTP routes and manage backend API interactions for seamless data integration.
- Demonstrated MongoDB expertise by designing schemas, managing indexes, and implementing replication and transactions to optimize database performance.
- Enforced continuous integration and tracked bugs using Jenkins and Jira on 75% of projects, ensuring efficient workflows and high-quality deliverables.

Teaching Assistant | General Assembly | Remote — May 2022 – August 2023

- Collaborated with 9 instructors on course material to evaluate student performance and prepare recommendations.
- Developed and delivered comprehensive academic one-on-one and group tutoring to over 76 students, enhancing their understanding and enthusiasm for MERN stack concepts
- Offered 3 keyways for students to continuously improve software developer skills throughout their careers.
- Conducted 67 code reviews with students to problem-solve and offer alternative solutions.

Software Engineer (Contract) | Bigtincan | Remote — April 2022 – July 2022

- Developed and refactored over 40% existing components in 2 different environments from design mockups.
- Wrote unit test for 100% of components to ensure requirements were met for client-side users.
- Merged software changes using Gi and CI/CD pipelines to test and deploy final versions for production.

- Helped QA department test 53% components using Cypress to enhance user experience.
- Implemented new Theme UI and JavaScript techniques to provide clean code.

Front End Developer | meltmedia | Tempe, AZ April 2021 – March 2022

- Developed 6 websites implementing new color schemes, policies, components, expanding feature functionality, and refactored code for readability using Sass, CSS3, and HTML using Adobe Experience Manager.
- Built committed software changes using Jenkins (CI/CD) to test and deploy for production.
- Drove a 37% increase in website time-on-site by crafting interactive user experiences based on clean, reusable, and accessible code, ensuring cross-browser compatibility and incorporating compelling call-to-action features
- Discovered new software and techniques to maintain clean code for future client services.

Front End Developer | Dansons USA | Phoenix, AZ April 2019 - March 2021

- Provided clean code interfaces from UI design prototypes, while collaborating with various departments to contribute to a 14% increase in incremental revenues in one year.
- Built mobile-friendly user interfaces using HTML5, CSS3, JavaScript, Bootstrap 4, PHP, and Twig.
- Executed new changes on 4 websites creating an interactive user experience through optimization of media files, cross-browser compatibility, and call-to-action events.
- Established connections to transmit data and implement security measures working with IP addresses.

Web Content Specialist (Contract) | Ronin Consulting Group | Phoenix, AZ October 2018 - March 2019

- Spearheaded the use of a new Search Engine Optimization (SEO) tool increasing product visibility by 27%.
- Enhanced consumer experience by collaborating with sales and marketing teams to identify product inefficiencies.
- Used Google Analytics, Boostability, and Trustpilot to analyze web and social media metrics and measure the impact of communication strategies.

SQL Developer | Ipro Tech | Phoenix, AZ November 2017 - October 2018

- Diagnosed SQL data for 60% of company products to discover inefficiencies in client databases.
- Scripted SQL queries to provide solutions for clients and improve workflow, and file sequence.
- Used in-depth knowledge, stack traces, and log files to eliminate index fragmentations and check for data corruption on 5 out of 8 products.

Junior QA Engineer | Ronin Consulting Group | Phoenix, AZ December 2016 - November 2017

- Diagnosed and resolved unique problems associated with application software and operating systems.
- Aided in reducing the required time for manual testing by 9% for new product builds.

Service Desk Technician | Ronin Consulting Group | Phoenix, AZ March 2015 - November 2016

- Diagnosed and maintained application availability for customers by providing technical solutions and interacting with proper settings, which resulted in an 86% ticket closure rate.
- Implement and enforce security policies to protect systems and data.
- Ensured that software applications and operating systems are up to date with the latest patches and updates.
